Abstract of JP2004203887

PROBLEM TO BE SOLVED: To obtain a composition for hair eliminating problems of frizzy hair encountered when hair is subjected to higher humidity.

SOLUTION: The present invention relates to hair compositions each comprising at least one lecithin, at least one amphoteric surfactant, at least one nonionic surfactant, at least one film forming polymer, and at least one cationic polymer. The compositions are preferably used to maintain hair's natural shapes and/or their curled definition.
